Question 1

Write a python script that implements **Creaser Cipher encryption** technique:

In this technique, each alphabet is move forward by two alphabets like A is replaced with C and X is replaced with Z. Your program will input message of just 10 characters (only alphabets) and then print its encrypted form.

Sample Output:

```
1  Enter Message:  ABCDEFGHIJ
2
3  Encrypted Message:    CDEFGHIJKL
```
